MBBS (S'pore)
Masters Med O&G (S'pore)
FRCOG (UK)
MRANZCOG (Aust-NZ)
FAMS (S'pore)

Anthony has more than 15 years of institutional practice before setting up ASC Clinic for Women at Gleneagles Hospital, Singapore.

He graduated from the Medical School of National University of Singapore, and obtained his Masters Degree (O&G) in Year 2000. He is a Fellow of the Royal College of Obstetricians & Gynecologists in United Kingdom as well as the Academy of Medicine, Singapore.

Anthony has a special interest in laparoscopic surgery and was awarded the Singapore Government Scholarship for Advanced Laparoscopic Surgery. He spent a year in Sydney Australia mastering the art of Laparoscopic Pelvic Floor Reconstruction and Severe Endometriosis Surgery.

Following his return, Anthony became the Director of Minimally Invasive Surgery Centre at KK Hospital and spearheaded the KK Laparoscopic Fellowship Training Program. He has trained many specialists from Malaysia, Thailand, Brunei, Indonesia and Philippines in advanced laparoscopic surgery. His passion for teaching earned him the KK Hospital Outstanding Clinical Teacher Award in 2007.

Anthony is the first gynaecologist in Singapore to perform Single Incision Laparoscopy. He is among the few in the region to have done more than 200 such cases and is frequently invited to teach and demonstrate Single Incision Laparoscopic Surgery. As a result, Anthony performed the first Single Incision Laparoscopy Hysterectomy in Indonesia, Philippines and Vietnam.

Apart from laparoscopy, Anthony still enjoys guiding his patients through their pregnancy and finds the birth of their newborn, the ultimate joy one can experience with the parents.
